MERCHANT SHIPPING - HAIPHONG, NORTH VIETNAM

25X

25X

25X

On photographed the port of Haiphong, North Vietnam (Figure 1) at very low altitude providing excellent coverage of the port and surrounding facilities.

The three large merchant ships in the harbor (Figures 2 and 4) were identified as a Murom class (probably the Mukachaevo), a Poltava class (probably the Bjanak), and a ship similar to the Ole Bratt class which is ex-Norwegian (possibly the Song Jiang).

The Mukachaevo (Soviet, 10,107 Gross Registered Tons (GRT) length overall (LOA) was docked at the Chamber of Commerce Wharf No. 2. It was impossible to determine whether the ship was on or offloading. However, there were a large number of objects similar in appearance to POL drums in the immediate vicinity of Chamber of Commerce Wharf No. 2.

The Bajnak (Soviet, 11,081 GRT, 510' LOA) was underway downstream at the time of photography and was riding high in the water. The holds appeared to be still open, but empty.

The Song Jiang (Communist Chinese, approximately 5,000 GRT, approximately 450' LOA) was possibly onloading sacked or baled material from three small lighters which were tied up alongside the merchantman. There was no indication of offloading activity on the wharf proper.

Materials and equipment observed in the harbor area included approximately 18,000 cubic feet of timber in the form of sawlogs, six prefabricated steel possible unit type bridge sections with two possible launching noses for this type of bridge, and three disassembled Soviet E-651 type craneshovels (Figure 3).

Coal and ore stockpiles (Figure 3) are noted in the following table:

Material

Estimated Volume

Coal (in the main yard)

5000 cu. yd. (Estimated to be 40% of coal yard capacity)

Probable coal (outside the

main coal yard)
Possible Pyrites

1700 cu. yd. 1300 cu. yd.

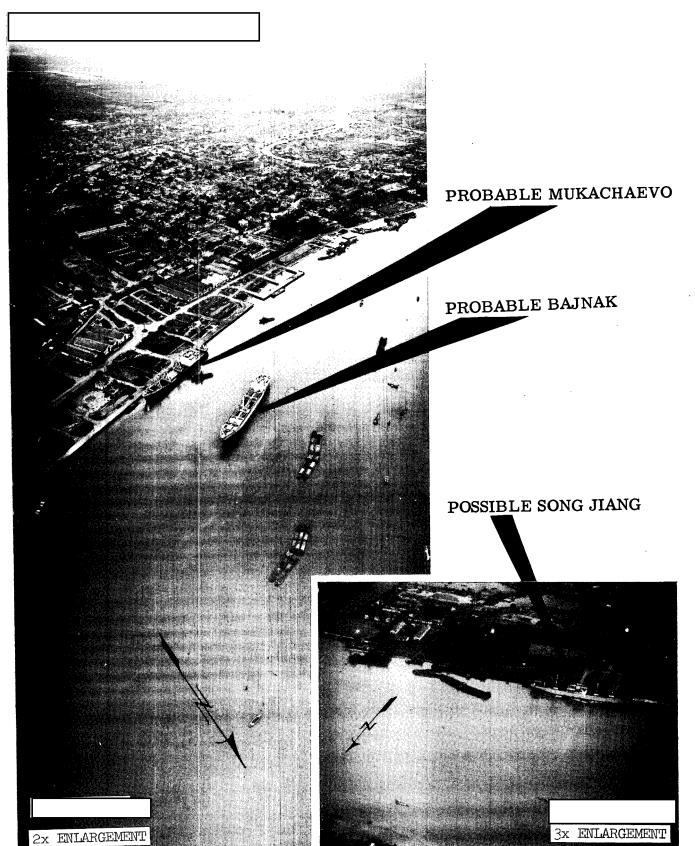

Possible Apatite

300 cu. yd. (Remains of old stockpile)

All measurements were made by the CIA/IAD Project Analyst.
